

ECCO e-Library Keywords

In the re-designed ECCO e-Library, each presentation is assigned one or more **categories**, which are based on the ECCO IBD Curriculum. Each of these categories contain a number of keywords which are then assigned to congress presentations and webcasts within the ECCO e-Library.

Categories:

1. Aetiology of disease (pathogenesis, genetics, immunology)
2. Diagnosis
3. Assessment
4. IBD Multidisciplinary Team (nurses, dietitians, pharmacists, psychologists, etc.)
5. Surgery and IBD
6. Treatment options and individualised care
7. Special situations (e.g. pouchitis, refractory proctitis, fistulising, acute severe UC, stomas, short bowel syndrome, EIM, elderly, traveling, etc.)
8. Endoscopy in IBD
9. Fistulising Crohn's Disease
10. Reproductive health & pregnancy
11. Complications and Co-morbidity
12. Nutrition
13. Psycho-social effects of disease
14. Non-inflammatory symptoms in IBD
15. Paediatrics and Paediatric to Adult transition
16. Novel therapies
17. Basic science
18. Clinical trial design and outcomes
19. Career advice
20. Guidelines methodology

Keywords:

1. Aetiology of disease

- Dietary factors
- Environmental factors
- Epidemiology
- Exposome
- Genetic factors
- Immune checkpoint inhibitors
- Microbiota
- Natural history
- Smoking

2. Diagnosis

- ANCA, ASCA, other serum markers
- Colitis of uncertain type and aetiology
- Collagenous colitis
- Crohn's disease
- Differential diagnosis
- Eosinophilic enteritis
- Histology
- IBDU
- Indeterminate colitis
- Infectious colitis
- Ischaemic colitis
- LGV
- Lymphocytic colitis
- Microscopic colitis
- Proctitis
- Ulcerative colitis

3. Assessment

- Anti drug antibodies
- Anti TNF drug levels
- Calprotectin and other faecal biomarkers
- Capsule endoscopy
- Colonoscopic surveillance
- Colonoscopy
- CRP and other serum biomarkers
- CT scan
- Disability
- Disease activity Indices
- Dysplasia
- Health economic (analysis)
- Montreal Classification
- MRI
- Mucosal healing
- Nutritional assessment
- Patient reported outcomes
- Prognosis
- Quality of life (IBDQ)
- Remote monitoring
- Score
- Therapeutic drug monitoring
- Thioguanine nucleotides
- Thiopurine methyl transferase (TPMT)
- Transmural healing
- Ultrasound

- Upper Endoscopy or Oesophagogastroduodenoscopy

4. IBD Multidisciplinary Team

- Dietitian
- IBD nurse
- MDT
- Pharmacist
- Psychologist
- Quality of care
- Virtual Biologics meeting

5. Surgery and IBD

- Colectomy
- Digestive tract damage (Lemann score)
- EUA
- Ileo anal pouch procedure
- Ileo caecal resection
- Ileorectal anastomosis
- Intestinal transplantation
- Laparoscopic surgery
- Post operative complications
- Post operative medical management
- Preoperative management
- Stoma
- Strictureplasty

6. Treatment options and individualised care

- 5-ASA
- Adalimumab
- Anti-diarrhoea
- Anti-TNF agents
- Biosimilars
- Budesonide
- Certolizumab
- Ciclosporin
- Complementary therapies
- Corticosteroids
- Dietary therapy
- Golimumab
- Infliximab
- JAK inhibitors
- Methotrexate
- Pain medication
- Patient choice
- Pharmacogenetics
- Pharmacokinetics
- Prebiotics
- Probiotics
- Tacrolimus
- Thiopurines (AZA / MP)
- Tofacitinib
- Treat to target
- Ustekinumab
- Vedolizumab

7. Special situations

- Acute Severe Colitis
- Arthralgia
- Erythema nodosum
- IBD in the elderly
- Incontinence
- Non perianal fistulae
- Ocular Manifestations
- Oral Crohn's disease
- Osteopenia / osteoporosis
- Other extraintestinal manifestations
- Penetrating disease
- Perianal disease
- Perianal fistulae
- Post-operative IBD
- Pouchitis
- Proctitis
- Pyoderma gangrenosum
- Sacroileitis
- Sclerosing Cholangitis
- Thromboembolism
- Vulval Crohn's disease

8. Endoscopy in IBD

- Autofluorescence
- Balloon enteroscopy
- Capsule endoscopy
- Chromoendoscopy
- Colonoscopy
- Dysplasia
- Endo-microscopy
- Endoscopic therapy
- Narrow band imaging
- OGD
- Pouchoscopy
- Stricture dilatation
- UC colorectal cancer surveillance

9. Fistulising Crohn's Disease

- Abscess
- Enterocutaneous fistula
- Enteroenteric fistula
- Enterovesicular fistula
- Perianal disease
- Recto-vaginal fistula

10. Reproductive health & pregnancy

- Fecundity
- Fertility
- IBD and breastfeeding
- IBD in pregnancy

11. Complications and co-morbidity

- Associated autoimmune disease
- Clostridium difficile
- CMV
- Colorectal cancer

- Concomitant Infections
- EBV
- Hepatitis B
- Hepatitis C
- Hepatosplenic T cell lymphoma
- HIV
- HPV
- IBD and malignancy
- IBD in the elderly
- IBD-associated cancer
- Immunisation / vaccination
- Lymphoma
- Malnutrition
- Morbidity
- Mortality
- Obesity
- Psychological co-morbidity
- Travelling with IBD
- Tuberculosis

12. Nutrition

- Anaemia
- Enteral supplements
- Exclusive enteral nutrition
- Folic acid
- Iron deficiency
- Micronutrients/Macronutrients
- Nutritional status
- Parenteral nutrition
- Vitamin B12 and/or folic acid deficiency
- Vitamin D deficiency

13. Psycho-social effects of disease

- Absenteeism
- Adherence to therapy
- Coping
- Disability
- Psychological co-morbidity
- Sexuality
- Work productivity

14. Non-inflammatory symptoms in IBD

- Fatigue
- FODMAP
- Functional symptoms
- IBS
- Incontinence
- Visceral pain

15. Paediatrics and Paediatric to Adult transition

- Growth
- Paediatric
- Transfer
- Transition

16. Novel therapies (reviewed annually)

- Anti-adhesion molecule
- Cell-based therapies
- Etrasimod
- Etrolizumab
- Faecal microbiota transplantation
- Filgotinib
- Guselkumab
- Mirikizumab
- Ozanimod
- P-19 inhibitors
- Risankizumab
- S1P receptor modulator
- Stem cell transplantation/therapy
- Upadacitinib

17. Basic science

- Apoptosis
- Aryl hydrocarbon receptor
- Autophagy
- B cell
- Defensins
- Dendritic cell
- Environmental factors
- Epigenetics
- Epithelial barrier
- Epithelial cell
- Fibroblast
- Fibrosis
- Genetics
- $\gamma\delta$ T cell
- Immunology
- Inflammosomes
- Innate lymphoid cell
- Intraepithelial lymphocyte
- Lymphocyte
- M. Paratuberculosis
- Macrophage
- Mesenchymal cell
- Metabolomics
- Microbiota
- Neutrophil
- Non-specific immunity
- Paneth cells
- Proteomics
- T cell
- Transcriptomics

18. Clinical trial design and outcomes

- Commercial
- Disease activity indices
- GDPR
- Histological remission
- Investigator-led
- Outcome measures
- Patient reported outcomes
- Real world data
- Registries and Big data
